Jeff Soules, right, vice president and general manager at U.S. Aviation, welcomes Wesley Pearce, founder of Aircraft Precision Maintenance, recently at the Denton Airport.

The two companies will join forces to expand U.S. Aviation's maintenance operations, which will now have mechanics on call 24 hours a day, with a shop open 18 hours a day, seven days a week.

U.S. Aviation was recently given permission to become a fixed-base operator at the airport.

The company's expanded expertise will give it the ability to work on Cessna, Cirrus, Mooney, Diamond, Beechcraft, Pratt-Whitney, Rotax, Remos, Tecnam, Lear-Jet and Citation aircraft.

Aircraft Precision Maintenance will operate in a new 14,400-square-foot facility near U.S. Aviation.
